

## CHAPTER 4

# Korea Embarrasses Phony Amerika. Redux of Russia's global embarrassment of Socialist JFK and LB Johnson during the 1960's cold war.

~OR~

## Let US Peasant Babies Die Starving.

After viewing an intellectual *Ted-talk* given by a North Korean family who escaped out of Korea through China into Europe seeking political asylum, the ah-ha moment came to me about America. Her story was typical except for one feature. *The narrator said, her N. Korean government told its people that Americans were literally sick and dying outside of medical facilities from lack of healthcare access. For that and other reasons, her family chose progressive Europe as their new home instead of seeking political asylum in backwoods USA. Secretary of State Hillary Clinton at the time bawled it all propaganda.... No! It is not! I suffered greatly and nearly died in America for that very reason, Hillary. In seeking help, the US medical and social safety net systems I spent my life supporting, rejected me proper. Moreover Hillary, explain the millions of US Vets who have suicided in the last 6 decades from not getting needed care from this country, over 300,000 who died waiting on secret lists during Mr. Obama's last term in office! What about the hundreds of thousands, perhaps a million or more, of them who died on VA waiting lists within the last decade from not getting help? What about 100 US veterans that suicide daily from abuse, neglect and betrayal by VA and US?! North Korea embarrassed the US during Obama's administration for not providing basic accessible healthcare to all of its citizens the same way Soviets disgraced JFK and Johnson administrations by revealing to the world that the US Socialist government allowed its people – babies and children - to literally starve to death during the US-Soviet Cold War. During which the US playing popularity politics destroyed excess food supplies – per party propaganda supposedly to prop up farm prices – then distributed much of the excess freely to other countries of starving people while denying that same 'charity' to its people here in the 'homeland.'* *The N. Korean government's statement is true; America's boasts are falsehoods hiding that truth, Hillary, which is the jackboot of US 'Nazi' National Socialism. American Socialists boast that their system is the greatest. Is it? If so then why are people who can afford to do so escaping from here, denouncing citizenship and moving to other countries like Sweden? Why are more high quality immigrants fleeing into Europe instead of to here, and why are increasing numbers of US citizens, especially school children, abusing drugs to escape reality, killing each other,*

dying by suicide and self-destruction, or just giving up than at any other time in American history?! Why does a Communist totalitarian N. Korea provide better care for its people than the USA? Because life under National Socialism is so great as your propaganda boastfully claims? NAZI is a German acronym for National Socialism; when people condemn NAZI ignorantly they condemn US National Socialism! The only successful aspect of it is that Socialism fails 100% every time it is tried, and that includes government run socialized medicine; history proves that in toto. If you want to learn how anything should not be done, take a look at any government and everything it gets its hands on. My brainwashed parents said Democrats aka Socialists are a party of the poor people. I lived and grew up under US Socialism and it is not good at all. All I ever knew the party to do for poor people was keep us that way and create more of them. Then enchain us with shame for being poor. Just like the party blamed US Military and Vets as for losing their unwinnable Vietnam War. Then scapegoated us via propaganda songs like 'Universal Soldier' as red herrings away from the true criminals, our son's and daughter's body bags and this nation's war crimes. Socialism is nothing more than looting, rag picker Communists dressed in Socialist regalia aka – drag. A pig in lipstick and dressing gown remains a pig; that is the pork trough of Socialism.

## CHAPTER 5

# To Die or Not to Die ~OR~ Nobody Leaves Here Without Owner Permission.

I was so damned sick and hurting, and never knew a human body could feel so terrible and live; for me, Death was the only way to stop my suffering. *BTW here is the farce about suicide Crisis 'Helpless-lines.'* Talking about a problem when someone is as sick and desperate as was I is a very bad joke; words to one suffering an agonizing dying until Death do not stop that kind of pain! Moreover, the sheer hypocrisy of the Veterans Affairs 'Crisis Line' is that it is only a facade covering up a liability shift from VA to their vendor. When anything goes wrong, which is most all of that disaster, first bark out of VA is scapegoat the vendor. All liability shifts from VA to the Crisis line vendor. Currently, the agency cannot shake the veterans suicide crisis it created especially those VA caused deaths on

VA campuses nationwide caused by VA medical staff drugging and mentally terrorizing troubled veterans into self-murder. In other words, VA purposely murders veterans by drugging s/he up with dangerous psychotic drug mixtures then applies psychiatric torture to terrorize a paranoid, suicidally hysterical patient before turning him loose to finish the job. Induced suicide is a psychological torture method developed during Korean War. Documented suicides of bound prisoners locked in cells choking to death after swallowing his tongue after undergoing this torture. 24 veterans under VA MHC treatments died by suicide on VA campuses within an 18 month period between 2017-2019; aka the parking lot & in clinic suicides. That is why VA is on the fast track trying to offload all medical liability especially MHC: hundred million dollar lawsuits for wrongful deaths caused by VA. Awards are over 2 billion dollars and shooting straight up. Those are your tax dollars that VA is wasting, BTW! VA owns the veteran suicide epidemic completely. Moreover, malpractice suits follow the same up trend pattern as well. The beauty is vet healthcare and benefit privatization is now a given and on the fast track to reality. Over 92% of all veterans do not use VA; opting instead for private care through employer, private and other benefit systems. Avic Roy and renowned journalist covering this trend coined VA the worst healthcare and benefits system in USA. To continue... **However, before I could suicide something bizarre occurred.** On the day, I planned to die, while finishing and finalizing a loose end, this happened. An impromptu, at one in millions of odds against happening, synchronicity: another Veteran acquaintance who vanished over 22 years ago and I literally bumped into each other...which is another story entirely. **Only a true Vet can help and another Vet;** during my era, from the moment a raw recruit sets foot in BMT, 'basic Military training' until the moment s/he graduates to next duty assignment and on, the soldier learns "**take care of each other because that is all you got...**" **Civilians are clueless to Military culture and that is the sheer absurdity of using them in places like VA, to 'help' ex-military people. None have the integrity to shovel guts to a starving bear, and they do not assist us as much as their arrogant egos mislead them to imagine that they do.** Only because of the aforewritten and his experience under similar circumstances, did this Vet know what to do with me. He literally dragged my feebly protesting sick and dying ass into a local VA clinic for help, as he would have a wounded soldier from a battlefield. No! I protested – they murdered my dad and I will die before returning to that shit-hole! He said, "Not on my watch, bud." Then he went on to say, "**I will kill you myself if you do not fight 'these bastards' for what you need.**" 'You promise me that asshole!?' **Believe me it was a continual fight. Getting help from those bastards like pulling chicken's teeth!!!!** The only reason VA let me in the door is because my mentor told them this man is suicidal. **I literally was!** Unknown to me then, the agency had a real PR problem with Vet suicides and needed no more dead bodies to its credit. Their fear of Donald Trump and VA Secretary Wilkie that if another veteran died from

lack of care they would fire the whole bunch! The help I got was only collateral benefit to saving itself from worse PR and firings by a very angry and hostile Washington DC Obama & Trump lootership embroiled in a major VA scandal that cost Socialists the 2016 elections and serious damage to that party's image. Vet suicide epidemic was protesting lack of care from VA and Socialists, and the new Trump administration was chopping heads to stop it. Though in the door, I still endured seven and a half months of delays, dehumanization, racism, bigotry, denials and more typical Veterans Affairs BS before getting the first clinic visit. Were it not for a couple of brave Veteran VA employees who gave me tribal knowledge getting around barriers to care instead of the brush-off, I would have certainly died: **only a true Vet can help another Vet.** During that time, my mentor would not let me give up and die; he stuck to me like a wet shirt. To keep my interest he kept plugging how great was VA; however, **The 1 star, lowest rated in the state, North Texas Healthcare VAMC system let us down badly at every twist and turn.** *The whole Veterans Affairs system exists to deny veterans benefits, employ government bureaucrats, and fill political pork troughs for its cronies and friends using the stolen veteran benefits loot.* I gave up numerous times; 'this shit is just not worth it, man. None of it makes any sense! Why must I fight these people to get help? These arrogant, socialist, asses act like they are doing *me* a favor and that I exist solely for their benefit. I have paid taxes and my dues over 55 years and these Socialist bastards act like I am the thief. Vets are the only reason they exist at all. What is the point!' He hung on – I hung on. Finally, VA accepted me for the first appointment to see a doctor. The agency has its moments. By then I was so damn sick that I nearly did not make the appointment. My veteran mentor made sure that I did not miss it. Funny thing, once in VA hands, true to his gypsy style, my guide disappeared again. This man is like a ghost; he mysteriously shows up when needed, then enigmatically vanishes back into the past leaving only a shadow as sole evidence of his visit. **Guardian Angels sometimes wear cowboy boots, hat, jeans, and drive old, beat-up, pickup trucks when not riding a horse on an open Texas range herding cattle into a sunset.** A little old saying: **"The Divine works through people."** Attending VA clinic doctor did not know what to do with me, and immediately shipped my sick, dying, rotting carcass by ambulance to a local Fort Worth, TX civilian hospital. There I spent five days in ER and ICU until stable enough to ferry by ambulance to the Dallas, TX Regional VA hospital 60 miles away where I spent another 5 days. Nobody officially died at VA during Trump's administration. Per the clinic and ER doctors, a couple more days is all that separated me from the morgue and addition to the lists of 300,000 dead vets waiting for VA medical care during Obama's administration alone. It was a race between death by suicide or by military caused diseases while waiting for help. VA did not want another dead Vet on its hands attracting attention from Washington DC, so it sent me to a local civilian hospital to die. Standard VA liability & patient dumping while keeping

budget for employee perks. National issues about which Washington and VA still have gnawing on their natural Asses. I missed Death by one or two days, which was just fine with me; I was very sick and badly hurting, and I still am. Five days in ER and ICU, civilians constantly worked using emergency measures to pull me back from brink of death until stable enough to transport by ambulance to Dallas Regional VAM. There hospital staff copied the detailed civilian hospital's treatment report to the letter. Including five botched Foley changes training nurses in the procedure. They tore up my urinary system so badly I passed blood for almost two weeks. Then out of ignorance they continued following emergency measures training their medical staff on me. VA medical hospitals, clinics are training grounds to evolve their staff of medical ignorance! They are clueless people employed in the worst medical system in Amerika. Now, emergency attention works in a crisis but not under routine maintenance afterwards. Since those people did not know what else to do, they continued imitating private sector care procedures from a civilian hospital report with very negative consequences. Before firing that circus of the absurd to reprivatize, I spent 36 months of disastrous baby step recovery two steps fwd and one step back training VA medical staff and various residents to overcome medical ignorance in its clinical and hospital training environments. A miracle considering VA incompetence that had neglected, and severely sickened me numerous times during recuperation – ditto that to other veterans along with VA murder by medicine. Something much higher is involved in this whole affair; I have unfinished business to close. There is no other explainable reason why I am alive. I did none of it alone; help came just in time from the most unexpected places and people, which is another incredible story. Divinity works through people. I do not believe in miracles – I am living one.

## CHAPTER 6

If US Socialism is great, then why do our children have such a hard time growing up?

~OR~

In Crisis, Socialist's Lie, Deny, Blame and  
Cover Up

It is never Socialism so they blame our kids.

<https://www.the74million.org/article/a-parkland-teacher-speaks-out-after-the-shooting-the-district-did-not-help-us-deal-with-the-trauma-with-2-new-suicides-were-still-suffering-the-consequences/>

**US Socialist Society and culture are enemies and our children brutally reflect that disease. ‘We have found the enemy and it is us,’ said Pogo.**

Another Broward County Florida public school student died by suicide; in sum, a high school student fed up with bullying and abuse *by faculty and students* walked into school, handed his girlfriend a suicide note, pulled out a gun and in front of her and a shocked student body **blew half of his head all over the school building.** **Socialist Spiral of silence immediately covered up the crime.** Socialist media politicized it as a second amendment attack and gun control issue. School authorities called in bathetic mental health care or MHC for public show, to counsel teachers & students, more cover up, ad nauseam. Education authorities did everything to secrete their criminal impotence. The only things local school district did effectively after the tragedy, as a local newspaper showed, was to “hide, spin, deny and threaten.” School district leaders falsely labeled facts about what went wrong as “fake news” and put all the blame on the National Rifle Association. *Anything to spin, hide and cover up the truth that a diseased 90-year-old Socialist American culture and society are destroying our kids; Socialism demands that it has to be the kids not a dysfunctional system!* “... Something is seriously wrong in the lives of our young people...” said Jean Twenge. Yep, they reflect a very sick US social environment and culture. Does any of this sound like typical Socialist US government and VA? **One lone teacher and a truly strong woman spoke out to break the spiral of silence;** you can read the rest of the story at the link above. The story reads straight from annals of a US, government PR–spin covering up another Veterans Affairs caused veteran suicide in the ongoing national suicide epidemic. When Socialism digs into a hole instead of throwing down the shovel, *it digs more to fill up the hole.* VA – stop murdering veterans to make Amerika great again. Party smiles everyone :(

**The following is core point dialogue between Ms. K, the heroic teacher, and truth from a babe’s mouth:**

**“I told my student [the boy’s girlfriend] she should go talk to someone, and she replied,” I just tell a different person the same story that they can’t handle. I don’t want to go again. They’re stupid.”**

**“Don’t say that,” I replied. “They’re not stupid. They’re just not trained.”**

**“I’m sorry, Ms. K,” my student said. “They’re not stupid, they’re just shitty.”**

Ms. 'K' should have left well enough alone at 'stupid.' The teacher could not stand to see that child's mental and emotional agony, which will haunt her for life; **Ms. K** broke the Socialist spiral of silence to cast first stone breaking the glass house of a corrupt school district. **She examples a truly courageous and strong woman**, which is very different from the obnoxious, loud mouthed lout, brave coward, PC, TV 'strong women' one encounters daily in media and her wannabes in public. I agree with the child: **MHC ignorance is shitty!** That is exactly how I feel towards VA counselors; especially all 'untrained' MHC people **"they're just shitty,"** exactly! That is the same attitude VA has towards Vets for our ills and traumas, as uttered from a child about Socialist public education bureaucrats. **In socialism all bureaucrats are interchangeable, replaceable, expendable, cookie cutter duplicates- aka, just plain shitty.**

## CHAPTER 7

**US Dept of Veterans Affairs is 100% responsible  
for all on campus veteran suicides.**

**~OR~**

**Drug 'em, mentally terrorize 'em  
then watch a vet blow up!**

**VA purposely murders vets through "INDUCED Suicide."** Hard examples of that truth glaringly manifest as seven Vet suicides on VA campuses within first five months of 2019, three in five days. 24 veteran suicides in an 18 month span ***all*** of them on VA campuses between 2017-2019. Protests written in veteran blood screaming VA and America's failure to help them and the lack of and horrible care by the worst Socialist government medical and benefit system in USA. **One Vet killed self on a VA parking lot immediately after discharge from the Dallas hospital MHC ward.** Two more died in a monk style self-immolation one on VA hospital front steps Another self-immolated days later on VA property next to a grassy, tree lined area by a busy street. One observes these same style protests in Tiananmen Square or Red Square in Communist China and Russia respectively. When they happen there, US media bony-fingers and broadcast the tragedy to a fault egoically boasting US supremacy over their tyrannical government systems. *However, when that same catastrophe happens in America, for the same tyranny,*

on the front steps of a US government facility, media goes silent except for red herring distraction to another freak show under Washington's bread, wine, and circus Big Top. Over one-hundred active duty Military soldiers and Vets a day, contrary to the lies issued by government – in an ultimate protest – kill selves from not getting needed care from this country. For many of us, without the help and support we need, suicide is not a matter of if but when one is finally successful. Imagine that! People in Amerika under 'great' US National Socialism are so happy that they suicide by the hundreds daily?! Something is amiss and mass media is telling the biggest porky-lies ever! I have first hand experience with this issue. Whether a Vet self-destructs on an installment or single payment plan remains the same – SUICIDE! Another tragic death from US dysfunction & abandonment. Each suicide financially rewards Veterans Administration: for each one, Washington, DC - 'DC' stands for 'doesn't care' - throws more money at the problem while VA cries alligator tears from the pay window to an offshore, Swiss bank account. That is incentive to stop more suicides!? As an added benefit the agency does not have to kill us, we do it for them while it publicly claims to have done everything in the agency's power to prevent another tragic death...wink, wink, nod, nod, \$\$\$\$\$\$. Washington DC's lootship tosses it more money, sort, wash, repeat, spin...spin...spin...spin...\$\$\$\$\$\$\$\$\$\$\$\$\$\$\$\$ - ad nauseam. **Only America and VA could sink so low in sewer filth figuring out how to profit from active and ex military personnel suffering and suicide. Show your support for America! Invest someone else's resources, kids and families. And Vets don't forget, as the billboards advertise, "Choose VA for the benefits you deserve."**
